The text block is not carefully observed.

Chapter titles are in large red pen on separate line, in Im, Lo subtitle in black pen, in Bu bordered by paragraph signs (three red or black inverted apostrophes).

Chapter titles are repeated in small back pen on the margin (though some were cut in the binding process).

Text division: by paragraph symbols in the form of inverted red apostrophes, red dots, and <i>intah? </i>signs; they cluster in certain parts of the MS, e.g., the end of the Kd chapter, pp. 242-50. Text highlighting is by red overstrike; the inquit is highlighted by retracing the <i>!m</i> of <i>q?la</i> in red pen, or writing the entire word in red pen.

H2 thinner line and and narrower spacing,

becoming more narrow at the end of fol. 5v to

arrive at connecting point in text.

The restoration is made from a different

continuum, resulting in a number of duplicated

units.

Characteristics: final <i>alif</i> with second

stroke downwards crossing beneath baseline;

final <i>h?? </i>occasionally as a hook, similar

to small <i>d?</i> in Mc 15 twice, Mc 32 twice;

rare medial <i>h?? </i>as v-shape ????? in Mc

64; <i>madda</i> marking <i>alif mamd?da</i>

is often written suprasegmentally above the

word ????? for ????? in Mc 2; in ??? for

??? in Mc 3; and ????? in Mc 32, etc. In Ag:

between the two <i>alif</i>s of ????

Diacritics: often at distance from letter; rare

<i>Muhmal</i> signs; small m?m beneath b?ma

in Mc 20; small ? beneath ????? in Mc 71. The

two dots of <i>y??, q?f </i>and sometimes on

<i>t?</i> are combined into a small arch; for

<i>y?</i> this is an u-shape.

Vocalization: mostly in redundant places such

as <i>fatʔa</i> on <i>wʔw</i>, <i>Shadda</i>

on sun letters and <i>tanwʔn alif</i>.

Some <i>kasra</i> is reverse oblique;

<i>fatʔa</i> and <i>ʔamma</i> written

connected as ligature, ?????? in Mc 3; ??????

in Mc 11; ???? in Mc 44; ???? in Mc 46.1.

Chapter titles marked by thick red pen, chapter division by new centered new line, chapters are ended by a dotted triangle. Table of contents with synopses (6r-8r) has titles in thick beige pen with thin brown contour, synopses ending either with short centered line or dotted circle or triangle. Text division: thick red pen, occasionally combined with small spaces, dotted circle, and red dot, marks subtales (min amth?li). Text highlighting: thick red pen, occasionally combined with small spaces, dotted circle, or red dot, marks inquit (q?la , fa ?i?nnah? yuq?lu , also with mashq , see script), sentence-initial words

<i>thumma</i>, <i>fa-bayn?</i>,

<i>wa-rubba</i>, <i>wa-l? yanbagh?</i>), and
